

The Deputy Vice-Chairman

Marseille, 2018 December 17

Object : Structuring Action "Potential for the development of Aix-Marseille technology platforms". 2019 A*Midex financing

Ladies, Gentlemen,

As part of its policy of innovation and valorisation, AMU, associated with the CNRS and Inserm, with the support of the A*MIDEX foundation, is launching for the second consecutive year its structuring action "Potentialisation du développement des plateformes technologiques Aix-Marseille".

The objective of this action is to offer responses to technology platforms according to their needs in order to optimise their action, enhance their activities and service offers, perpetuate their technological and scientific tools by promoting their opening to the socio-economic and cultural world. This action, which is for a maximum period of 12 months, non-renewable, is exclusively focused on the implementation of additional human resources, in the form of a one-year non-renewable fixed-term contract.

Following the recommendations of the steering committee of the technological platforms, the A*Midex steering committee of December 10, 2018, decided to validate the recruitment of 11 people of technical staff for 14 **Aix-Marseille technological platforms**. Some recruited staff will be shared between platforms. This benefits from a total budget of €398 864.

List of winning platforms:

Platform	UMR / federation	Responsible
Biologie structurale	AFMB	Alain Roussel
Biomasse	IMM	Marie Thérèse Giudici
CEP	LPL	Laurent Prévot
CRVM	ISM	Daniel Mestre
