Lauréats d'un contrat doctoral IM2B – Interdisciplinarité

2020

- **Ketty Tamburini** : Functional characterization of intrinsically disordered regions in fungal LPMOs Co-encadrement Jean-Guy Berrin (BBF) & Sonia Longhi (AFMB)
- **Lise Molinelli** : Deciphering protein oxidation during biomass degradation by filamentous fungi using chemoproteomic approaches Co-encadrement Lionel Tarrago (BBF) & Thierry Tron (ISM2)
- **Mathieu Sourice** : Study of Fe-S dependent secondary-metabolites of myxobacteria Co-encadrement Béatrice Py (LCB) & Marc Maresca (ISM2)
- **Lucas Dupuis** : Copper tolerance systems in *Pseudomonas aeruginosa*: role in defense against phagocytosis Co-encadrement Bérengère Ize (LISM) & Marianne Ilbert (BIP)

2021

- **Louis Delecourt** : Unravelling the molecular basis of metabolic interactions in synthetic consortia dedicated for bio-H₂ production Co-encadrement Marie-Thérèse Giudici-Ortoni (BIP) & Christophe Bordi (LISM)

2022

- **Varun Ravishankar** : Investigating the VDAC:Bcl2 complexes implicated in apoptosis using Double Electron-Electron Resonance Co-encadrement James Sturgis / Lucie Bergdoll (LISM) & Guillaume Gerbaud, (BIP)
- **Camille Herrou** : Molecular mechanism of Type IVa pili activation by SgmX in *Myxococcus xanthus* Co-encadrement Latifa Elantak (LISM) & Romain Mercier (LCB)
